

THE PELLA CLAD RAINBOW

Leave it to Pella... they've captured the rainbow. They're using color to fill window and door openings with bright splashes of excitement or subdued and subtle shading. The colors shown here give just an idea of what's available.

Since developing its custom color capabilities several years ago, Pella has supplied all of the varied tones in the Pella Clad Selector. You can specify Pella's colors or choose your own rainbow spectrum for the entire line of clad fixed and operable windows, doors, sloped glazing units or clad panels.

The shade you select may be delicate... the finish is not.

All Pella Clad colors are Polyceram[®], a finish that has proven itself under the most extreme conditions of climate and exposure. Polyceram is highly resistant to fading, chipping, peeling, blistering and chalking. Its linear polyester melamine coating insures quality and durability that withstands salt spray, mortar, corrosive substances and airborne contaminants as well as dirt and washing detergents.

Call the Robert Hunt Corporation at (800) 432-1851 and capture the Pella rainbow.

MORE THAN JUST A GREAT IMPRESSION

Sure our concrete imprints are handsome, however, in addition both Bomanite and Bomacron are also cost effective solutions to many of your home's needs. Anywhere you may have considered the use of asphalt, Chertahatchee, or plain concrete, Bomanite and the textured varieties of Bomacron offer durability in a vast array of colors and patterns that will not only add beauty but also resale value to your home. So whether you choose either Bomanite or Bomacron to enhance your home's pool area, patio, drive, walkways, or gardens, you'll soon realize you never expected so many benefits while creating a great impression!

And now,
ECLIPSE reflective
from LOF.

You design a structure with certain basic elements in mind. • Now there is a powerful—almost elemental—new design material to consider: • ECLIPSE reflective from LOF. • Until now, pyrolytically coated glass has lacked presence. It was designed to blend with any architecture. Any materials. Any surroundings. • But ECLIPSE reflective is bold. Dramatic. Without the milky, yellowish cast of some other architectural glass. • Yes, there are other, more practical reasons to choose ECLIPSE glass. Reasons like solar control. Post-tensileability. A remarkably low absorption characteristic. And availability that verges on the immediate. • Not to mention the fact that ECLIPSE reflective can be used in low, mid or high rise structures, with the coating glazed to either the first or second surface. • Still, the best reason to choose ECLIPSE glass is the simplest: *It looks so beautiful in a building.*

GORY ROOF TILE. WE'RE THE TOP

HOW THIS SMALL EXAMPLE FAITHFULLY REFLECTS OUR SUPERIOR STANDARDS

The leaf. Each plant we painstakingly nurture is composed of thousands, sometimes tens of thousands. Its health, color and resistance to outside elements are living signs of the expert care given to each and every Acclimatized plant we sell. It is a testimony to the hours of hard work, from its early stages in the field, carefully root pruned, to its slow, gradual Acclimatizing in our private shade houses. We pioneered the process of **Acclimatizing Foliage**. Each healthy green leaf represents a process we've perfected.

Acclimatized Foliage from East Marsh Nursery. Our standards are the ones by which all others are judged.

Florida is a state that poses many challenges for the architect: the demands of an often harsh climate that is both friendly and enemy; of thousands of miles of shoreline and of a fragile environment; an exploding population, and an interior that ranges from rolling hills and forests in the North to huge lakes, swamps, bays and lakes in the South. Florida is also diverse in its cultural heritage — many of our building types having come from North Florida "cracker" cabins and conch houses brought from the slacks of the Caribbean. In addition, our Mediterranean heritage is undeniable. It can be seen everywhere — from Addison Mizner's Palm Beach to the Georgian state mansions.

So much of what is familiar about Florida architecture, to even the casual visitor, is its fantasy architecture — the architecture of tourist come to see. But beyond St. Augustine Main Street in the Magic Kingdom, the Biltmore, the Breakers and lots of big houses, are historic buildings representative of every period from antebellum to the present. In addition to regional pockets of Greek Revival and Victorian structures, some styles flourished here — Art Deco and Mediterranean revival, for example.

Today Florida architects are producing a rich variety of buildings for cities with populations that will double in ten years and that kind of growth imposes yet another responsibility. We've gone from sprawling, breezy, low-density communities to high-rise cities in a very short time.

This issue of *Florida Architect* was designed to welcome architects attending the National AIA Convention in Orlando and to show a "bit-of-the-best" of Florida's architecture.

Welcome to our state. It has much to offer.

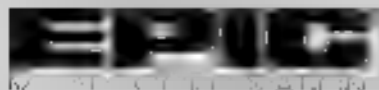

Shane D. Steer

Alto Ross Designs First U.S. Project

The University of Miami has commissioned Italian architect Aldo Rossi to design a new School of Art for new campus. The design project is to architecturally integrate the building with the existing campus.

Rossi is familiar with the University of Miami campus and the university plans for his future. He worked as a junior architect at the University of Miami's 1984 famous Master Plan Commission. He has been commissioned a development schematic design for a complex of buildings for the School of Architecture. The project will provide significant public space, including an auditorium, an exhibition space and a reference library. The university is seeking funds to build a large construction in the near future.

Jose Tamarit Bayon, dean of the school, said there is a tradition of architecture education and research in the school. The project of the school is to build a new building for the school and a new building for the school. The project is to build a new building for the school and a new building for the school.

Aldo Rossi is well-known in Europe for his 11 Teatro de Mar del Plata for the 1979 Biennale in Venice and many other buildings including the Congress Palace in Milan and several other buildings. He is also an important architectural theorist. His published works include "The Architecture of the City" and "The Architecture of the City". His drawings were part of the "Architecture of the City" exhibition at the Museum of Modern Art in New York City in 1984.

Exterior rendering of the new School of Art building designed by Aldo Rossi for the University of Miami. The building is to be built on the campus of the University of Miami.

Lumber Dealers to Meet

The Florida Lumber and Building Material Dealers Association will hold its 1989 convention and buying show September 20-25, 1989 at the Marriott World Center in Orlando. For information, call 305/944-0902.

Broward Chapter Design Awards

The Broward County Chapter of the AIA announced its 1989 Design Awards in February. The award ceremony was held at the Abbots Field. The award ceremony was held at the Abbots Field. The award ceremony was held at the Abbots Field.

The highest award, the First Award for Excellence, was given to Donald Singer and Associates

for the Fire Prevention Bureau Office in Fort Lauderdale. An Award of Excellence in Information was presented to George H. Hines for his work on the old Hollywood Beach town center and into modern developments.

The Award of Excellence was given to Michael R. Hines, major architect, and Engineers, Inc. for his work on the Fort Lauderdale Police Administration and Laboratory Facility in association with Michael R. Hines and Associates, Inc. for the Administrative Office Building for Broward County Housing Authority in Fort Lauderdale. The award ceremony was held at the Abbots Field. The award ceremony was held at the Abbots Field.

CORREX

The CORREX building is a new design which will be the first of a series of new projects which appeared on the March 1989 issue of Florida Architect. The project was designed by the firm of Thomas A. Spohn & Associates, Inc. The project was designed by the firm of Thomas A. Spohn & Associates, Inc. The project was designed by the firm of Thomas A. Spohn & Associates, Inc.

New Commissions

David Jay Reinberg, AIA, Architect P.A., is soon expected to design a new manufacturing plant for Plastic Corporation, a subsidiary of Arington Industries, Inc. The 30,000 sq. ft. factory and corporate offices will be located in nearby Florida. Reinberg is also designing the interiors for High National Bank new branch bank and drive thru teller in Ft. Lauderdale. Baratta & Associates recently was contracted to design Allen Haines Commercial High School and new buildings for Florida's State Public Day Schools. Campus Services Architect for FAL is handling the South Florida & Broward Schools of Health & Hospitality. Design built for \$2,000 sq. ft. which will be located adjacent to the present capital plant is also designed by the State for a type in North Virginia County for the State of Florida. Department of General Services

amper's Wife Specialty Shop designed by Modern Associates Architects, Inc. is a 2,000 shopping plaza in Norwalk, Conn., nearing completion. The \$1-million development is owned by Mike Prepper for Leisure Warehouse Corporation. Architects have been commissioned by his Target Bay Federal credit union design advisory board to select a firm which will expand by adding, according to the firm's plan, a new addition for future growth. Architects has completed design drawings for a 25,000 sq-ft development for Union Bank and also worked by Architects and

for the design of a nearly 200,000-sq-ft complex of buildings that will house a community center, the Memphis Children's and Adult Center. It has been awarded to the National Partnership. The project is expected to cost about one million dollars, and will offer housing and education center facilities to help African-Americans, says the architect. The design is a seven-story tower floor plate that is a single access to West Park South. Each of the floors plan and elevation has been customized for specific use.

Kenneth H. Koch Associates Architects, Inc. has designed three villa models for the luxury community of Forestchapel in north Tampa. The 30 units range from 4,000

to 500 s.f. and are unified by custom designed swimming pools and patios. Charles Schneider Associates AIA, PA has been selected by Myrtle Inc. of North Palm Beach to design Jura Beach Townhomes—custom homes of 3,000 s.f. each with a 3-car garage and private elevator. The homes will be right on the ocean. The Stewart Corporation Architects was first selected by the accounting firm of Price Waterhouse to provide interior architectural services for their new Tampa office which is currently under construction. *

Helman Hurter Cleveland Peacock Architects have been chosen to design the clubhouse at the International Golf Club in Orlando. The club is being developed by Newton Lyden & Chancellor and W. F. Spears & Associates, Inc. Mulano Associates has constructed the design for Terrace Way shopping Plaza in the City of Temple Terrace for the Regency Group of Jacksonville. The \$4.2 million development occupies 18,000 s.f. in space. Shy Veda assisted in the development of the Thamel Park Square in Dallas, Texas, which is under construction. The project was designed by James C. Rupp, Architects, Inc. and Phase 3 is scheduled for completion this September.

Adrianne Thayer in South Miami is the \$15 million, eight-story, 250,000 s.f. office building by Charles Harrison Fowler AIA, Adrienne Thayer. The building is outfitted with a total of 136 broad, elevated floors that effectively separate the offices, but do not impede the view. Also completed is the Heller Group's 34,000 s.f. addition to its retail store which was opened in Hurlburt Island in Tampa. * Currie Schneider Associates AIA, PA has been selected by Marian Quirk, developer of Starlink Center, to design the 11,000 s.f. center which will feature the new executive offices and quarters for the Florida Ballrooms.

K.B. Architects, Inc. has been selected to design the North Campus Student Center project for

the Florida Community College at Jacksonville. Construction is underway on the new, 100,000 s.f. North Florida Computer and Information Science Building designed by Pappas Associates Architects. In the new 2,000 s.f. facility will house the Advanced Computer Operations Center and the school of computer science.

Awards and Honors

The Evans Group recently received their third "Best of American" "Best Award" for their design of the 15-story, 110,000 s.f. office building. The award was presented at the Annual Convention of the National Association of Home Builders in Las Vegas.

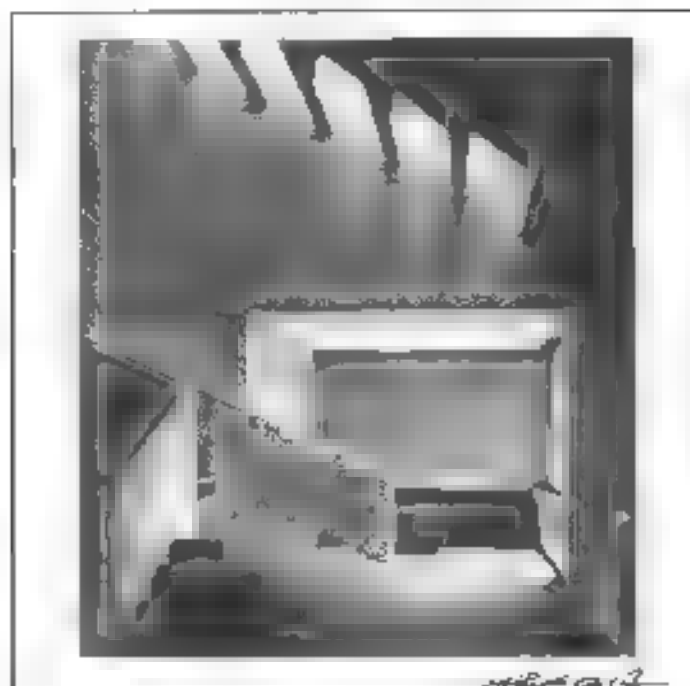

Additionally, an office show-room/warehouse facility in Charlotte, North Carolina, which was awarded a "Community Appreciation Award" by the City

of Charlotte. The facility was designed by Fugleberg Koch Architects of Winston, North Carolina and Dallas.

K.B. Architects, Inc. was the recipient of three design recognition awards sponsored by the Jacksonville chapter of AIA. The awards were received for the Ruppert Building, the new college of business administration at Jacksonville University and for the Addition and Renovation to the Hospital (Jewish Home) in Jacksonville, Florida.

Whatever the size of your project, Tarmac Topblock can add a new dimension. Design freedom.

That's because our concrete masonry units give you more choice. Of shapes, sizes, colors and textures.

Yet Tarmac Topblock offers you even more than fresh ideas. We also bring you freedom from worry. Our guaranteed on-time deliveries and a full range of accessories—from wall ties to Topmortar—see to that.

Topblock is backed by the strength and resources of Tarmac, one of the biggest names in construction across the World. And that means that we

ensure that every single block in our wide range is manufactured to the highest possible standards. We use only the finest Tarmac aggregates. We subject our products to extensive laboratory testing. And our knowledgeable architect/engineer advisory staff

are always on hand to deal with any queries you may have.

With such freedom of choice, such quality units and such efficient, single-source service, it's not surprising that Tarmac Topblock is the name for masonry units in Florida. So wherever you're building, specify Topblock. And take a new look at block.

In the mid 1990s, however, the situation of power changed markedly. It was as if the end between D'Silva and Jayaram was over and Jayaram finally came in from North Florida and re-located.

Finally, the farm-to-market highway bill "clears the way" for the federal government to build and improve rural roads. The bill authorizes \$1.5 billion for the construction of new rural roads and \$1.5 billion for the improvement of existing roads. The bill also authorizes the federal government to provide technical assistance to states and local governments in the planning and construction of rural roads.

Orlando is Florida's "magic kingdom" in more ways than one

by Dr. Schmidt

When discussing the cultural and religious heart of the region's "Magic Kingdom," have you ever experienced a visit more than Walt Disney World? In little more than a decade, Orlando has been transformed from a sleepy agricultural village into a modern city and a cosmopolitan center of cultural and entertainment. Orlando's economic and high technology

The number of premiering architects and architects working in the area has grown by a factor of four in the past five years, according to the regional architectural firm. The area has gained more than 100 new architectural firms since the mid-1970s. The city's population has grown by 25% since 1970 and is expected to grow by another 25% by 1990. The city's population is expected to grow by another 25% by 1990.

No other statistical data, however, is as staggering as the number of new jobs created in the design and construction industry. The city's population is expected to grow by another 25% by 1990. The city's population is expected to grow by another 25% by 1990. The city's population is expected to grow by another 25% by 1990.

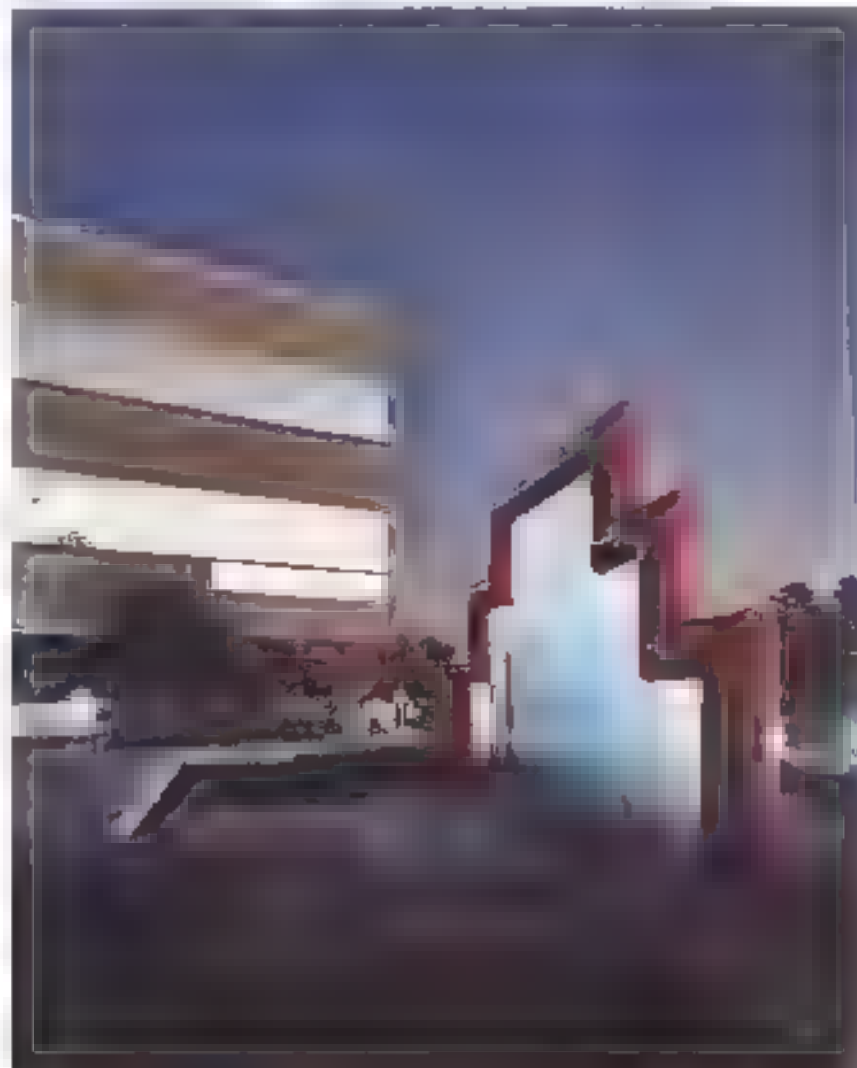

The increasing number of corporate headquarters and new construction projects in the area has led to a significant increase in the number of jobs created in the design and construction industry. The city's population is expected to grow by another 25% by 1990. The city's population is expected to grow by another 25% by 1990.

Meeting has been a excellent and will continue to be a excellent. The city's population is expected to grow by another 25% by 1990. The city's population is expected to grow by another 25% by 1990. The city's population is expected to grow by another 25% by 1990.

growth areas for the next 10 years.

to make the world's largest privately-financed development company.

Boston-based developer John F. Shea & Partners announced a late 1990 renovation and modernization \$175 million project, Airport Park. The mixed use development located on an 80-acre site just north of Orlando International Airport will include a series of 1,000 square foot office buildings. In completion, Airport Park plans to include a 250,000 sq. ft. 40,000 square foot retail center, and 100,000 square foot office space.

There is doubt that the opening of the \$400 million Orlando International Airport in 1991 was a high point in the airline industry's recovery. The economic crisis for airlines and airports for the time being. The decline of the airline industry is being the result of growing competition from the airline industry. The airline industry is being the result of growing competition from the airline industry.

A newly-announced program for Orlando International Airport includes a five-year expansion program that will include the construction of a new terminal building and its support facilities. The new terminal building will be located on the site of the terminal building. The estimated cost of these additional \$320 million is a major part of the total one billion dollar expansion program program for the airport through 2000. The project will create approximately 1,000 jobs up to 1995 and 1,000 jobs up to 2000. The project will create approximately 1,000 jobs up to 1995 and 1,000 jobs up to 2000.

The Orlando Airport is expanding to serve the millions of tourists who come to the city each year. The airport industry is booming with new construction and the airport industry is booming with new construction and the airport industry is booming with new construction.

Orlando: The new airport terminal building. The new terminal building is a major part of the total one billion dollar expansion program program for the airport through 2000. The project will create approximately 1,000 jobs up to 1995 and 1,000 jobs up to 2000.

in 1965, marking a seven per cent decline in volume from the year before. The downturn could be caused, some in the highway business think, by the fact that the state recently opened up the commercial plants to the public. Now both the state and the private sector are competing for the same business, which could hurt the state's share.

Florida's largest hotel, the Marriott Miami Beach Center, opened in May 1965. The 25-story facility houses 1,200 rooms, 10,000 square feet of meeting space, a 10,000-square-foot gymnasium, and two big ball courts. Other hotels in Florida have also been built, including the 1,000-room Holiday Inn, which opened in November 1964. And at the hotel's new selling point, the location is very active. From the Orange County airport and the city.

However, the biggest factor in Florida's hotel business is the state's tourism industry. The state is always planning ways to keep up with the in-creased number of tourists. In the past, the state has built a lot of hotels, but the state has also built a lot of other facilities, including a new airport, a new entertainment complex, and a new state university. The state has also built a lot of other facilities, including a new airport, a new entertainment complex, and a new state university. The state has also built a lot of other facilities, including a new airport, a new entertainment complex, and a new state university.

The quality and price of the state's tourism industry is also a factor. The state has a lot of beautiful scenery, and the state has a lot of interesting history. The state has a lot of beautiful scenery, and the state has a lot of interesting history.

Figure 1. A photograph of a person standing in a dimly lit room, possibly a hallway or a small stage. The person is wearing a dark coat and a hat, and their face is partially illuminated by a light source from the right. The background is dark and indistinct, with some faint light sources visible in the distance.

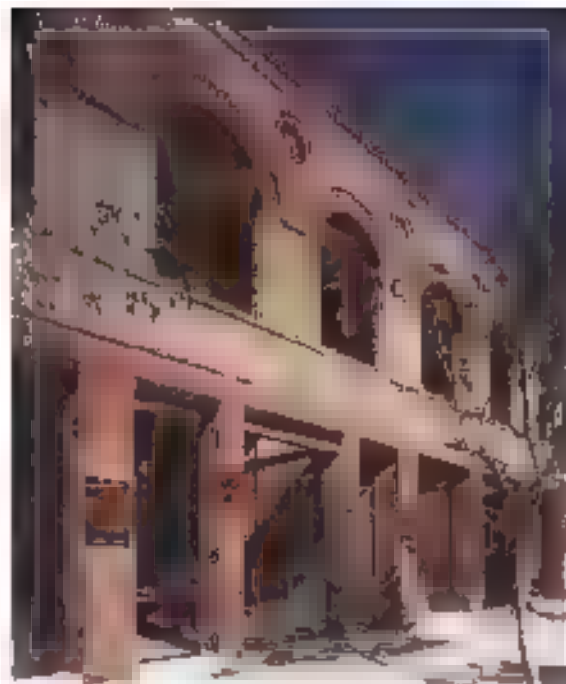

From "Cigar City" to "Florida's Next Great City," Tampa is the hub of Florida's Sun Coast

By Robert Taftman

Tampa is the hub city of Florida's Sun Coast. When you visit which includes the cities of St. Petersburg, Clearwater and Bradenton. Tampa's rich history tells visitors little bits of its story: the city was first grown up to be a major seaport, then a hub for the railroads, and later a major center for the cigar industry. Tampa's history is a rich tapestry of events and people that have shaped the city into what it is today. From its early days as a small settlement to its current status as a major metropolitan area, Tampa has a long and varied history. The city's location on the Gulf of Mexico and its proximity to the Florida Everglades have made it a major center for trade and commerce. Tampa's history is a testament to the city's resilience and its ability to adapt to change. The city's rich history is a source of pride for its residents and a major attraction for visitors. Tampa's history is a story of growth and progress, and it is a story that continues to this day.

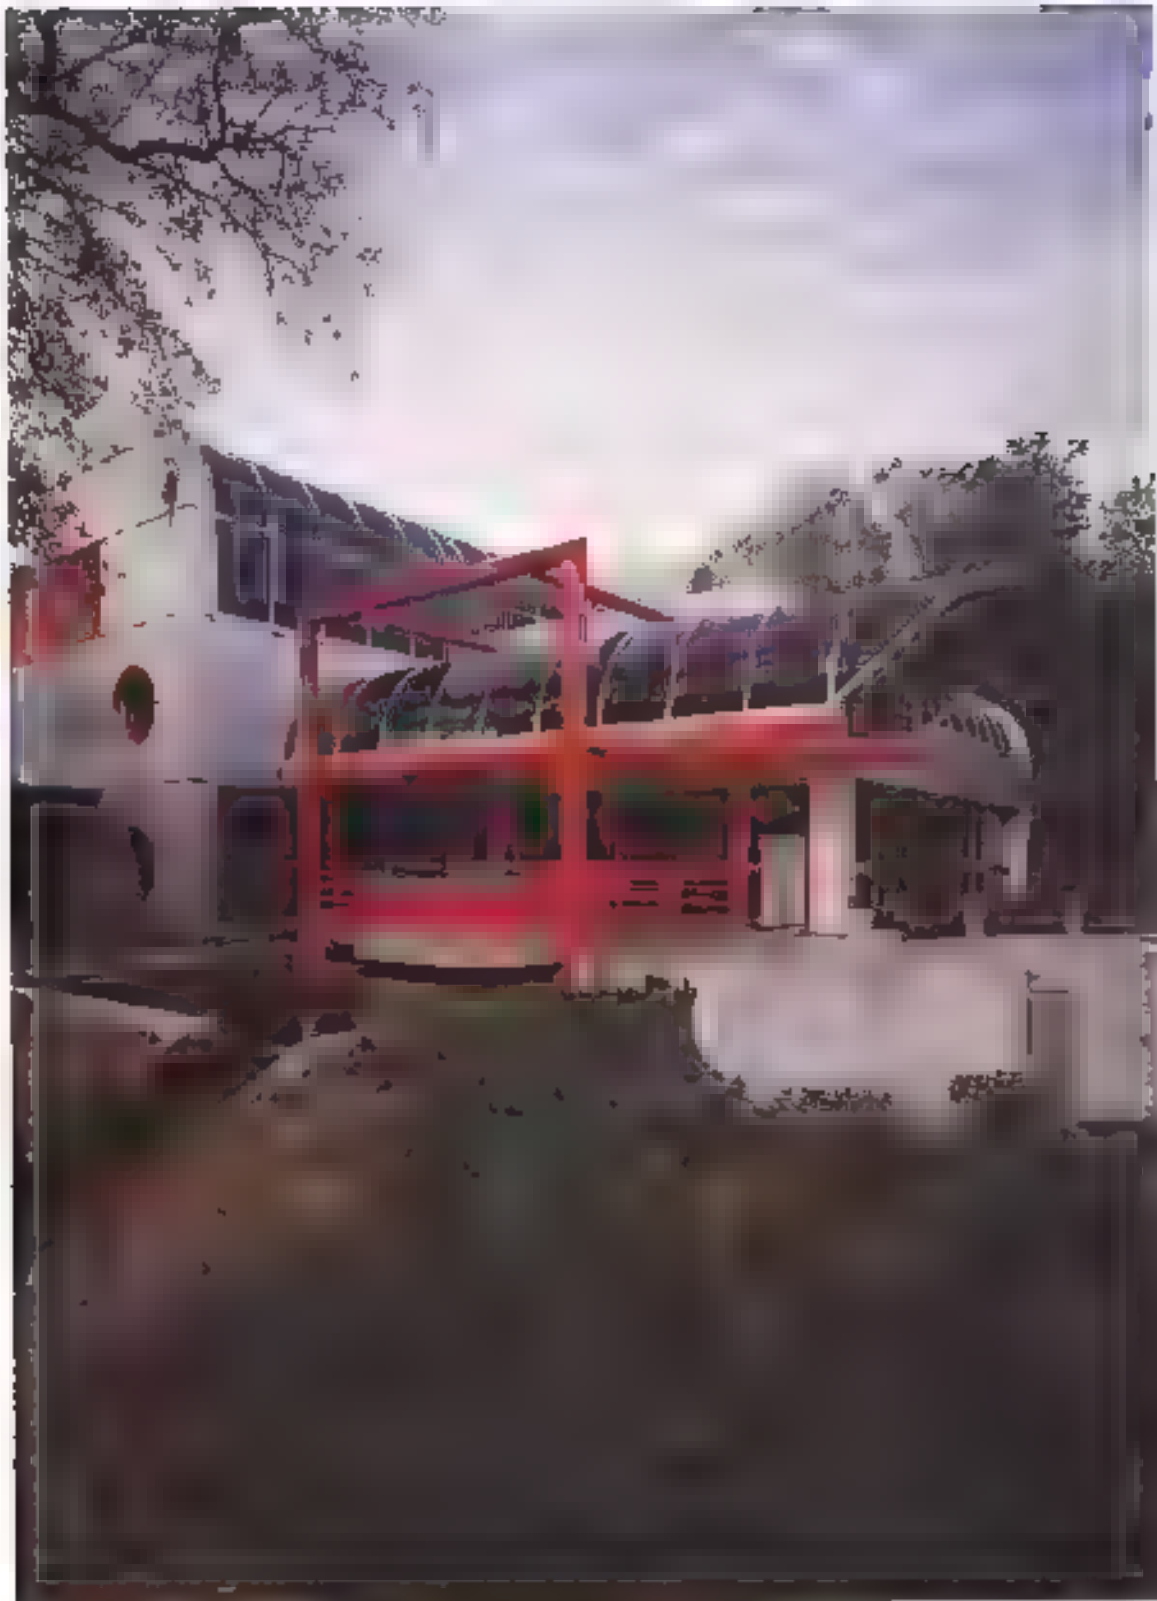

Tampa's true architectural heritage, however, lies with the old downtown of Ybor City, a designation historic district that is uniquely diverse. Founded in 1884 by cigar manufacturers Vincent Martinez and Jose, the city's main office building for the United Fruit Company was destroyed. But what remained in the wake of the city's destruction was a collection of historic buildings, including the historic Ybor City. The historic Ybor City is a testament to the city's rich history and its ability to adapt to change. The city's historic Ybor City is a source of pride for its residents and a major attraction for visitors. Tampa's history is a story of growth and progress, and it is a story that continues to this day.

There are also pockets of historically significant buildings in downtown Tampa and in the surrounding neighborhoods. The effects of the preservation movement, the Historic Preservation Act, and the National Historic Preservation Act, have helped to preserve the city's historic architecture. Tampa's historic architecture is a testament to the city's rich history and its ability to adapt to change. The city's historic architecture is a source of pride for its residents and a major attraction for visitors. Tampa's history is a story of growth and progress, and it is a story that continues to this day.

Opposite page: The building is a three-story brick structure with a white portico supported by columns. The building is surrounded by trees and foliage, with a large tree on the right and a smaller one on the left. The scene is captured in a slightly desaturated, vintage style.

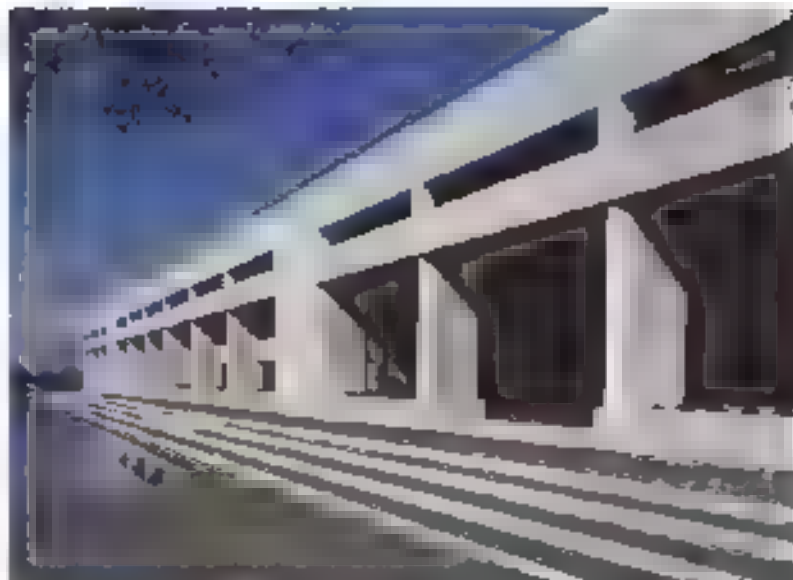

1942-1943, 1944-1945, 1946-1947, 1948-1949, 1950-1951, 1952-1953, 1954-1955, 1956-1957, 1958-1959, 1960-1961, 1962-1963, 1964-1965, 1966-1967, 1968-1969, 1970-1971, 1972-1973, 1974-1975, 1976-1977, 1978-1979, 1980-1981, 1982-1983, 1984-1985, 1986-1987, 1988-1989, 1990-1991, 1992-1993, 1994-1995, 1996-1997, 1998-1999, 2000-2001, 2002-2003, 2004-2005, 2006-2007, 2008-2009, 2010-2011, 2012-2013, 2014-2015, 2016-2017, 2018-2019, 2020-2021, 2022-2023, 2024-2025, 2026-2027, 2028-2029, 2030-2031, 2032-2033, 2034-2035, 2036-2037, 2038-2039, 2040-2041, 2042-2043, 2044-2045, 2046-2047, 2048-2049, 2050-2051, 2052-2053, 2054-2055, 2056-2057, 2058-2059, 2060-2061, 2062-2063, 2064-2065, 2066-2067, 2068-2069, 2070-2071, 2072-2073, 2074-2075, 2076-2077, 2078-2079, 2080-2081, 2082-2083, 2084-2085, 2086-2087, 2088-2089, 2090-2091, 2092-2093, 2094-2095, 2096-2097, 2098-2099, 2100-2101, 2102-2103, 2104-2105, 2106-2107, 2108-2109, 2110-2111, 2112-2113, 2114-2115, 2116-2117, 2118-2119, 2120-2121, 2122-2123, 2124-2125, 2126-2127, 2128-2129, 2130-2131, 2132-2133, 2134-2135, 2136-2137, 2138-2139, 2140-2141, 2142-2143, 2144-2145, 2146-2147, 2148-2149, 2150-2151, 2152-2153, 2154-2155, 2156-2157, 2158-2159, 2160-2161, 2162-2163, 2164-2165, 2166-2167, 2168-2169, 2170-2171, 2172-2173, 2174-2175, 2176-2177, 2178-2179, 2180-2181, 2182-2183, 2184-2185, 2186-2187, 2188-2189, 2190-2191, 2192-2193, 2194-2195, 2196-2197, 2198-2199, 2200-2201, 2202-2203, 2204-2205, 2206-2207, 2208-2209, 2210-2211, 2212-2213, 2214-2215, 2216-2217, 2218-2219, 2220-2221, 2222-2223, 2224-2225, 2226-2227, 2228-2229, 2230-2231, 2232-2233, 2234-2235, 2236-2237, 2238-2239, 2240-2241, 2242-2243, 2244-2245, 2246-2247, 2248-2249, 2250-2251, 2252-2253, 2254-2255, 2256-2257, 2258-2259, 2260-2261, 2262-2263, 2264-2265, 2266-2267, 2268-2269, 2270-2271, 2272-2273, 2274-2275, 2276-2277, 2278-2279, 2280-2281, 2282-2283, 2284-2285, 2286-2287, 2288-2289, 2290-2291, 2292-2293, 2294-2295, 2296-2297, 2298-2299, 2300-2301, 2302-2303, 2304-2305, 2306-2307, 2308-2309, 2310-2311, 2312-2313, 2314-2315, 2316-2317, 2318-2319, 2320-2321, 2322-2323, 2324-2325, 2326-2327, 2328-2329, 2330-2331, 2332-2333, 2334-2335, 2336-2337, 2338-2339, 2340-2341, 2342-2343, 2344-2345, 2346-2347, 2348-2349, 2350-2351, 2352-2353, 2354-2355, 2356-2357, 2358-2359, 2360-2361, 2362-2363, 2364-2365, 2366-2367, 2368-2369, 2370-2371, 2372-2373, 2374-2375, 2376-2377, 2378-2379, 2380-2381, 2382-2383, 2384-2385, 2386-2387, 2388-2389, 2390-2391, 2392-2393, 2394-2395, 2396-2397, 2398-2399, 2400-2401, 2402-2403, 2404-2405, 2406-2407, 2408-2409, 2410-2411, 2412-2413, 2414-2415, 2416-2417, 2418-2419, 2420-2421, 2422-2423, 2424-2425, 2426-2427, 2428-2429, 2430-2431, 2432-2433, 2434-2435, 2436-2437, 2438-2439, 2440-2441, 2442-2443, 2444-2445, 2446-2447, 2448-2449, 2450-2451, 2452-2453, 2454-2455, 2456-2457, 2458-2459, 2460-2461, 2462-2463, 2464-2465, 2466-2467, 2468-2469, 2470-2471, 2472-2473, 2474-2475, 2476-2477, 2478-2479, 2480-2481, 2482-2483, 2484-2485, 2486-2487, 2488-2489, 2490-2491, 2492-2493, 2494-2495, 2496-2497, 2498-2499, 2500-2501, 2502-2503, 2504-2505, 2506-2507, 2508-2509, 2510-2511, 2512-2513, 2514-2515, 2516-2517, 2518-2519, 2520-2521, 2522-2523, 2524-2525, 2526-2527, 2528-2529, 2530-2531, 2532-2533, 2534-2535, 2536-2537, 2538-2539, 2540-2541, 2542-2543, 2544-2545, 2546-2547, 2548-2549, 2550-2551, 2552-2553, 2554-2555, 2556-2557, 2558-2559, 2560-2561, 2562-2563, 2564-2565, 2566-2567, 2568-2569, 2570-2571, 2572-2573, 2574-2575, 2576-2577, 2578-2579, 2580-2581, 2582-2583, 2584-2585, 2586-2587, 2588-2589, 2590-2591, 2592-2593, 2594-2595, 2596-2597, 2598-2599, 2600-2601, 2602-2603, 2604-2605, 2606-2607, 2608-2609, 2610-2611, 2612-2613, 2614-2615, 2616-2617, 2618-2619, 2620-2621, 2622-2623, 2624-2625, 2626-2627, 2628-2629, 2630-2631, 2632-2633, 2634-2635, 2636-2637, 2638-2639, 2640-2641, 2642-2643, 2644-2645, 2646-2647, 2648-2649, 2650-2651, 2652-2653, 2654-2655, 2656-2657, 2658-2659, 2660-2661, 2662-2663, 2664-2665, 2666-2667, 2668-2669, 2670-2671, 2672-2673, 2674-2675, 2676-2677, 2678-2679, 2680-2681, 2682-2683, 2684-2685,

The Pequea River was constructed in 1935 by the Federal Government under the Reclamation project and is about 100 feet in length. It is a technology that has been used for water in the Reclamation project and is a technology that has been used for water in the Reclamation project.

Two local outlets are acquiring in Tampa this year, including the \$4.5 million 13-14.1 Cigna. Winesap, the Houston-Johnson Plaza Hotel, the Fairview by Marriott and the new hotel in Tampa at 10000 Avenue of the Southside. The new Plaza is building a 12 room hotel and restaurant, adjacent to the 1993 Biotech building.

The Sarasota School . . . 1948-1960

by Janet Landry, AIA

During the late 1940s and early 50s, Sarasota, Florida occupied a unique place in architectural history. The nation's first development to be manifested in Sarasota was a young architect named Paul Rudolph. A Harvard graduate who came to Sarasota in 1948 to work for Ralph Twitchell, Rudolph also became a partner in the firm of Twitchell and Rudolph.

The significance of the "Sarasota School" was made clear in 1961, a year out of the first major break with the internationalism. Rudolph's School. The Sarasota architects regarded and practiced the Rudolph philosophy. These architects were collectively interested in regionalism, climate and resources and they explored these topics in a depth never done before. Together they formulated many of the design and construction rules that are taken for granted today. They were concerned with structure, honest use of materials and experimental construction concepts.

Ralph Twitchell, Ralph Zimmerman and William Zimmerman are cited by the place book in addition to Paul Rudolph practices in New York. Peter Lundy and Lewis Houston, Rose Henshaw in Peasod Ridge, New York and William Rupp teachers at the University of Massachusetts. Mark Hampton, architect in Coconut Grove, Florida, and architect in White Haven, Florida and West Palm Beach. Frank Smith and architect in Sarasota. When it all began.

Top: Paul Rudolph House in Sarasota was designed by Paul Rudolph in 1948. The building is a landmark in Sarasota history.

Also: George and Norma Residence built in West Palm Beach in 1961 is a prime example of the Sarasota School's design philosophy.

Opposite: Sarasota High School was designed by Paul Rudolph. The design of the school was a landmark in the history of the Sarasota School. The school's design was a landmark in the history of the Sarasota School. The school's design was a landmark in the history of the Sarasota School.

Fort Lauderdale is the Gold Coast's state-of-the-art city

by Cherry Milnes

Fort Lauderdale is the "working" downtown of the largest and most beautiful state high-rise city in the country. The city's skyline is a testament to the city's high-rise skyline. The city's skyline is a testament to the city's high-rise skyline. The city's skyline is a testament to the city's high-rise skyline.

The city's skyline is a testament to the city's high-rise skyline. The city's skyline is a testament to the city's high-rise skyline. The city's skyline is a testament to the city's high-rise skyline. The city's skyline is a testament to the city's high-rise skyline. The city's skyline is a testament to the city's high-rise skyline.

THE NEW WORLD UNDER A Spanish flag is not a new thing. The discovery of the Americas by Christopher Columbus in 1492 was the beginning of a long and colorful history of conquest and discovery. The Spanish flag is a symbol of the power and glory of the Spanish Empire, which at its height in the 16th and 17th centuries covered more than half of the known world. The flag is a red field with three golden lions passant guardant, and a crown above them. The lions are the symbol of the House of Castile, and the crown is the symbol of the Spanish monarchy. The flag is a reminder of the great achievements of the Spanish people, and of the role they played in the history of the world.

“I have seen them in a grand range of beautiful growth, but I have never seen them with flowers as perfect as these.”

The Japanese are now sending equal interest in what may be called the new Japanese style.

These World Gardens, which are the Japanese water garden in the new Japanese style, are a very like Japanese style, and in all the new style.

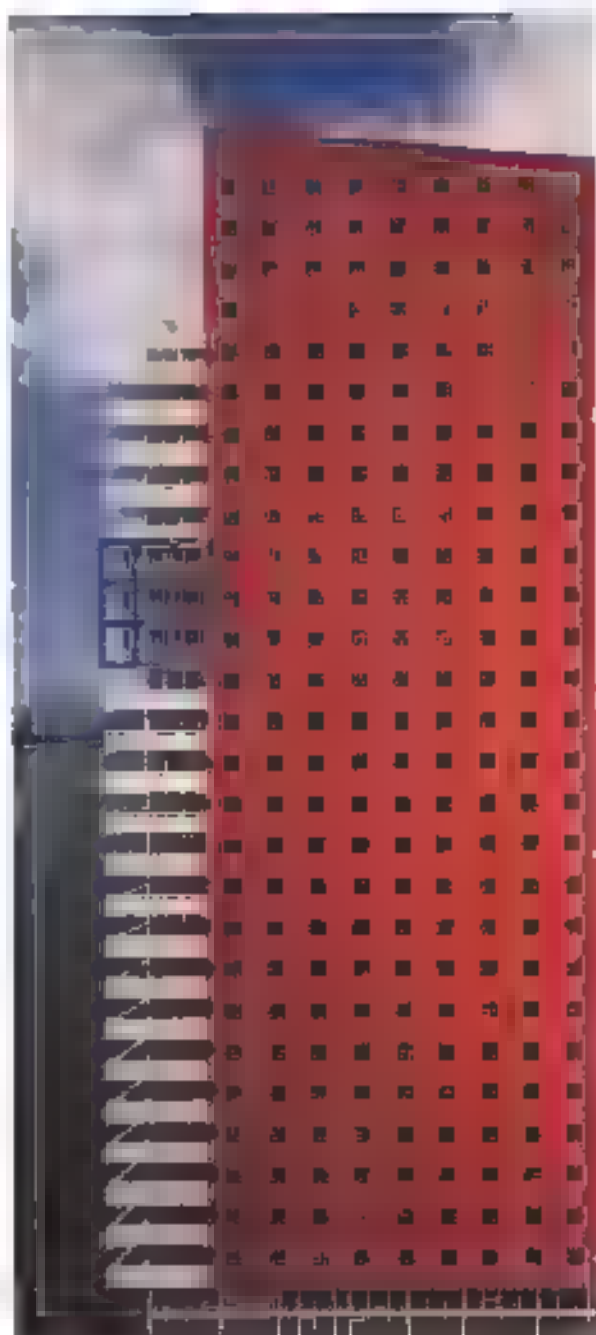

The setting is grand indeed. The site where the City of James began with settlement, this is Henry Ripley's Bay. Palm Beach in 1907 saw become the city's tallest skyscraper Southern Florida Center, designed by Schreyer, Harph and Mer. It occupies the site and dominates the skyline of the city. As the building rises, it rises the up a series of steps at its northern end, southeast corner. The tower is a series of steps, given Southwest Florida's history of stepped facades and is a series of steps, to different heights in a gradual crescendo towards the center, with a final step at the top, a series of steps, here offices command a breathtaking view of the bay, of the bay and the Miami River, Southern Building Center, the tower, the bay.

The tower is the 'crowned jewel' of a store building of a 'high end placed house' originally conceived by Olivetti and completed in the hands of Pininfarina, Gandola and Piretti. The lower steps in three layers, each one gradually sloping back to the main facade. It is just between these three steps in quarter circle with the curved end in the front. It

In 1982, the population of the Bay of Islands had almost tripled, resulting in a severe overcrowding. Almost half the households had no indoor lighting, no indoor plumbing, and no electricity. In 1983, the Government of Belize began a program of housing improvement. It provided the Bay of Islands with a building in Miami and agents to sell houses in the U.S. and Canada. The first time the building was sold, the agents had to knock on the door of the Miami Dolphins' general manager to get for Christmas, but within a few days on the telephone,

or furniture to interrupt his clean symmetrical space. As a result, the plans are now dotted with aluminum and plastic chairs, tables and umbrellas, which might happenstance and not in character with the original intent. To serve a good purpose for the firm, which has long been a crowd, 70-year-old Mr. Johnson had remarked in his words: "Comfort is not a function of beautiful design; we will fill our buildings with things that can be used."

But it is on Marshall Avenue where some of the firm's pioneering and experimental high-rise offices and condominiums are situated. In many ways, leading the way in the corporation is the firm's work in the field of architecture, design and construction. A large firm of young, bright architects who are not only trained in the firm's design and building, but also in the firm's design and building. The firm's work in the field of architecture, design and construction is a result of the firm's design and building. The firm's work in the field of architecture, design and construction is a result of the firm's design and building.

Influenced by the use of simple planar and geometric forms, lines and bright, primary colors, Romper Room's influence in larger-than-life architectural details arranged in building blocks fashion. Like the red "circular road" overhanging, perched atop the Atlantic. Symbolism abounds in Romper Room's work. There is a red line wave metaphor of an undulating wall in the headquarters of the Imperial in the Atlantic, the red line of a wall in the Imperial. The firm's work in the field of architecture, design and construction is a result of the firm's design and building.

a national treasury of Depression Era buildings. Within the past two years, the slanting South Beach area has been taken over by ambitious, enterprising realtors.

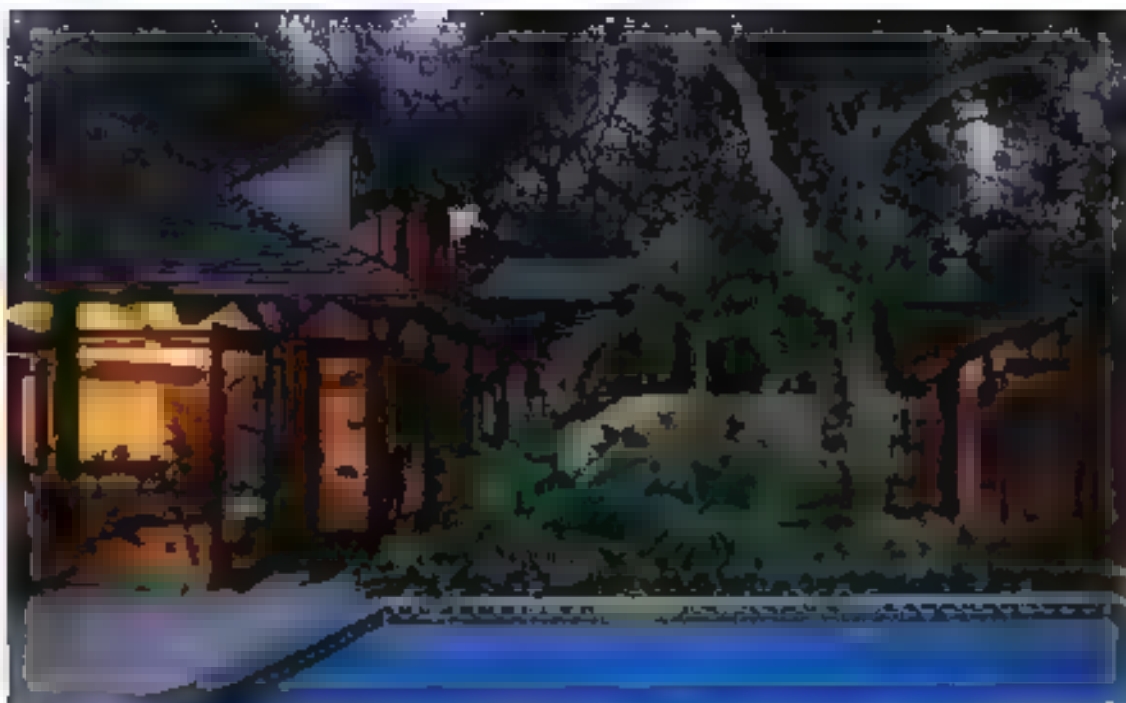

The firm was a development, architect and designer, and beyond the products of years of experience was evident in the plan. South Beach, they have invested a substantial Art Deco and Mediterranean style hotels, apartments and houses.

A PRODUCT OF MIRAFI INNOVATION

MIRADRAINTM

PREFABRICATED DRAINAGE STRUCTURES

The proven alternative to aggregate drains

The Miradrain concept consists of a lightweight 3-dimensional high-impact polymeric core and a Mirafi filter fabric. The Mirafi filter fabric is bonded to the surface of the polymeric core to maintain a rigid surface. This bonding prevents the backfill from pushing the fabric into the flow channels and reducing water flow. The filter fabric allows water to pass freely into the molded drain core where gravity drains the water through the flow channels to the discharge system. The Mirafi filter fabric also prevents soil particles from entering and clogging the core structure and discharge pipe, and significantly increases the effectiveness and service life of the drain system.

Miradrain systems effectively reduce hydrostatic pressure against below-grade structures and aid in de-watering saturated soil by collecting and conveying ground water to a drainage for discharge.

FIAT FUTURE **+ FANTASY**

Product News

A new Florida ordinance has recently been passed that will have a positive effect on the renovation of old, weathered, old-fashioned pool decks. The new code in effect relaxes the previous requirement of a 6-inch recess coping and now calls for only three inches on existing commercial pool decks. The two key words here are "existing" and "commercial." Many of the finer, jet setter hotels, condos and apartment complexes see this as a great cost effective opportunity to upgrade and refurbish their current pool areas.

A product is currently available from J. & M. Bonar, a company, the Fort Lauderdale-based firm which is the Bonarite Remanite licensee for South Florida, which has been in use for some time and is particularly well suited for the redesign of existing pool decks.

The product is a concrete coloring and imprinting process, will provide the customer with a variety of choices of colors, textures and patterns in applications where plain concrete, asphalt or whatever else may have been considered. In the case of older pools whose decks may be unattractive or out-of-style, the use of Bonarite Remanite may prove to be a more cost-effective method of enhancing and updating commercial pool decks. One available pattern that lends itself well to this type of application is called "Cajunite." The pattern is actually molded from pieces of genuine cut coral. Its multi-colored pattern provides a feel of expense and class, while its egg buff color. Coral stone look, resembles the appearance of expensive cut coral.

Information about Bonarite Remanite can be obtained by contacting Tony Bonar at J. & M. Bonar, 10000 Bonar Blvd. (See ad on page 11).

AA&C HAS A SPECIAL MACHINE TO PAY YOUR CLAIMS

Mahey Hingpradit, FA, AIA Senior Benefits Analyst

IT'S CALLED A PERSON!

AA&C's claims service features "real people" who care — a lot. Files are kept by family name, not a number, and claims are processed within 48 hours of receipt by AA&C. All of our analysts have been trained in-house because those who had outside experience couldn't give the personalized, caring service that our clients demand. Each analyst tries to find ways to "pay" claims, not to deny them, which is why 99.5% of the FA, AIA claims are paid vs. the normal 90%.

For further information, please contact the FA, AIA Group Insurance Service Organization:

VIEWPOINT

The Search for Florida Architecture

by John H. Minton, AIA

To the question, "Is the search for Florida architecture a real

ask, "Why is it that after 100

asking that question?" What has

thinking it insensitive to the re-

nesses. There may be an ele-

are more pragmatic factors that have played a significant role. Florida is 100 years old, but

was an arena of historical precedent forming its culture. For

mer Governor Bob Graham, in a

1988 *Florida Times* article de-

sign. Kitcher wrote musical notes,

most melody of harmonious interlocking chords. Part of the

for the whole and an insensitivity to all that is around us.

Another interesting factor contributing to Florida's lack of

"style" in the variety of building materials used in houses, city

block, even stone, steel and glass—all are a part of the Florida

environment that reflects the handwork of fine craftsmen. As

Rampart crime and fear of crime have also limited our efforts at regionalism. People are

make up a significant part of Florida's population, are often the hardest hit and the most af-

an microscope.

In addition, regionalism in architecture implies long-term stability in the neighborhood, an extended lifetime that grows richer with age. Tourism, while con-

need to our inability to develop regionalism in air-conditioning, and not all contributed to the

startling growth that occurred in Florida in the 1950s. With it,

and not all contributed to the startling growth that occurred in Florida in the 1950s. With it,

and not all contributed to the startling growth that occurred in Florida in the 1950s. With it,

and not all contributed to the startling growth that occurred in Florida in the 1950s. With it,

and not all contributed to the startling growth that occurred in Florida in the 1950s. With it,

and not all contributed to the startling growth that occurred in Florida in the 1950s. With it,

and not all contributed to the startling growth that occurred in Florida in the 1950s. With it,

and not all contributed to the startling growth that occurred in Florida in the 1950s. With it,

and not all contributed to the startling growth that occurred in Florida in the 1950s. With it,

NEW CORALAIS WASHERLESS FAUCETS

DON'T GET BY ON LOOKS ALONE.

KOHLER GAVE THEM GUTS.

The Corbin-Corbin cartridge uses System-C[®] design principles to give you superior performance at competitive prices.

Kohler gives no one else the same level of design expertise. And that's why Kohler's Corbin-Corbin cartridge is built according to System-C[®] design principles. This self-contained cartridge, made of quality Corbin-Corbin[®] brass, has no seals, no O-rings, no gaskets. And it was tested in over 500,000 on/off cycles.

The Corbin-Corbin design is a carefully thought-out combination of precision engineering and ergonomic design that makes it the right fit for your home.

There's a completely-enclosed Kohler cartridge for every need. Shown are only a few of the over 90 models Kohler makes, all in polished chrome or satin nickel finish. (Optional brass finish, too.)

But now there's another reason for you to buy Corbin-Corbin. Kohler will give you U.S. Savings Bonds!

To learn how to get this extra savings, turn the page.

INVEST IN CORALAIS™ AND WE'LL INVEST IN YOU.

A PROMOTION WITH GUTS.

- Buy Coralais faucets between October 1, 1986 and March 31, 1987.
- Earn more as you buy more—there's no limit! Buy 24 Coralais faucets and get a \$50 bond. Buy 96 faucets and get \$300 in bonds, etc.
- Buy direct from your distributor and send proofs of purchase to Kohler for payment.
- OR—easier yet—ask your distributor about the direct drop-ship program.
- Contact your nearest Kohler distributor for complete details about this promotion and the full line of Coralais faucets.

THE BOLD LOOK
